DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a coated wire cloth fabric, classified in class 428, subclass 545.
 - II. Claims 16-27, drawn to hat with reinforced wire frame, classified in class 2, subclass 175.4.
 - III. Claims 28-32, drawn to a garment with a malleable wire frame, classified in class 2, subclass 455.
 - IV. Claims 33-37, drawn to a method of making a hat with wire frame, classified in class 29, subclass 17.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II and Group IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Group II is a hat apparatus with reinforced wire frame. Group IV is a method of making a hat with wire frame with coated of a thermoplastic resin.
3. Inventions Groups I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

808.01). In the instant case the different inventions Group I does not require a hat that is required by group II. Group I does not require a garment with malleable frame that is required by group III. Group I does not require a method of making a hat with wire frame that is required by group IV. Group II requires a hat with reinforced frame that is not required by Groups I and III. Group III requires a garment with malleable frame that is not required by groups I, II and IV. Group IV requires a method of making a hat with wire frame that is not required by groups I and III.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
